

Federal Communications Commission  
Dear Commission Members:

The writer has been advised that the National Association of Broadcasters (NAB) is trying to exert influence through campaign contributions, as well as activities of their lobbyists, to urge Congress and the Federal Communications Commission to limit XM Satellite Radio's ability to provide its customers with locally oriented content, including the new XM instant traffic and weather channels.

The writer is a new user of XM Satellite Radio and has been extremely pleased with the quality of its programming and the clarity of its signal. In my opinion, it would be a terrible tragedy to try to legislate this company out of business by depriving it of the ability to serve its customers. It is my understanding that this legislation is presented as HR 4026, and obviously is another attempt by the National Association of Broadcasters to restrict satellite radio from offering traffic and weather and other valuable services to its many listeners. If they get away with that particular thing, there is no telling what they will try next, even to the point of eliminating XM Satellite Radio. I do hope that you will take this request into your heart as you vote on this legislation and vote it down.

Thank you very much.

Very truly yours,
